Bringing Community
together

Team members:

<4 />

Description:

MedGira is a web-based platform that connects Lebanese **healthcare providers** with medical tourists from all around the world offering them tailored package deals to fit their **medical travel needs**.

Thus reviving and supporting healthcare and tourism sectors in Lebanon as a long term solution for its **economy deterioration** and **brain drain**.

Project Name:

<ModuBlox/>

Theme:

Rehabilitation &
Construction

Team members:

<5 />

Description:

Modublox is a **shelter strategy**, based on a modular construction system, created with blocks made of **recycled materials** that consist of debris gathered from the site.

Modublox allows people to stay within their homes, which therefore enhances their **mental health**, sense of **belonging**, productivity, and most importantly preserving their dignity.
